In the Middle Ages, the practice of magic was not yet imagined to be essentially ‘female’. In fact, according to court records from the first half of the 14th century, the majority of those tried for maleficium (meaning sorcery, or dark magic) were men. That was because the most troubling form of magic – necromancy – required not only skill, learning and preparation, but above all education, which was less readily available to women.

Magic in the Middle Ages offers a captivating overview of medieval society and promotes reflection about certain stereotypes associated with this period.

In Magic in the Middle Ages Kieckhefer has produced an insightful account of magic "as a kind of crossroads where different pathways in medieval culture converge". His approach is fairly tightly focused on the sources; he starts by looking at two from fifteenth century Germany, an estate management handbook in the vernacular that contains scattered magical elements and a Latin handbook for conjuring demons.
